

## **THE “ORDER” IS IMMINENT**

The absurdity in the thought that the current train of events in the Social, Political and Economic world is just an accident is as clear as daylight! From the internal massacres of South Sudan to the radical attacks in the Middle East nations, who would suppose things are normal? From growing strikes in Africa's Zimbabwe to the daily escalating number in records of attacks in Europe, do we still think life is as it used to be before?

The thought that life continues as normal would hold much water had Japan not experienced the recent atrocious event, France the awful deaths and Russia the uncircumcised legislation. The world is slowly being plunged into a pool of insecurity. We only watch with striking horror when the next attack is coming and on whom it will fall. The events are portentous, the message is clear; we are about to have our minds lead into the path of utter “Chaos”, then the planned “Order”!

“Order out of Chaos!” is a reality. The string pullers of the world have their goal of attempting the impossible in perfect view, and the news media being an important striker in the drama. “Create Chaos, make the people desperate and you’ll have them fall for any suggestion that will seem to remedy the situation.” In what better way could such an impotent aim be brought to accurate fruition than by putting the mind of men in chaos and total desperation!
