Awards and Recognitions

I have been privileged to be recognized for my work and achievements by several wonderful individuals and organizations. Below are some of recent awards.

- **Marquis Who's Who in the World**. My name and achievements have been recognized in the 33rd edition 2016.
- Nominated and recognized as **Man of the year 2012** by International Biographical Centre IBC, Cambridge - United Kingdom for my contributions to the domain of computer and information science.
- My MSc, dissertation was recommended for publication and for an award by the examiners, 2000
- University of Garyounis Scholarship, 1994 & Libyan National Scholarship, 2003

Achievements and Major Work Undertaken

- Effectively designed, tested and evaluated the National Oil Corporation (NOC) digital library in Libya to boost up the services provided to end users.
- Successfully pioneered and created general guidelines for design of a low cost digital library services to assist in meeting the needs and requirements of special library users in developing countries and the Arabic speaking world by utilizing non-commercial content management systems. The abovementioned guidelines were presented at World Library and Information Congress: 75th IFLA General Conference. Milan, Italy 23-27 August, 2009.

Current Positions

- Elsevier's Research Ambassador.
- Chair and representative of the Society of Digital Information and Wireless Communications SDIWC in Libya.
- Member of the board of directors of the National Library of Libya in Benghazi.

Interests

My research interests are in the application of new technologies in different fields of library & information science focusing on innovative approaches.

I have been teaching subjects of information storage and retrieval, information science, information systems, knowledge organization, research methodology and digital libraries since 2011. My research interest includes also information seeking behaviour, cognitive and social issues of information process and digital technology. I have published considerable numbers of articles in national and international journals in addition to chapters in books and research papers.

I am interested in open access movement as a significant tool for narrowing the digital divide (through knowledge sharing) between the third world countries and the developed nations which continue to widen between the have and have-nots or the information rich and the information poor. This in its turn can have positive impact as an instrument for sustainable economic development. Therefore, I'm paying much attention to the use and utilization of open source content management systems such as Greenstone, Eprints, Fedora, and Dspace. Through my employment experience I have demonstrated my Professionalism, reliability and initiative. I have also joined a number of international associations and organizations specialized in the domain of computer and information science as academic member so that I can open new windows of opportunity for my professional growth and development. These type of organizations provide members the power to enhance their knowledge, skills, and enrich their professional options.

Research Areas

The following list indicates a number of the research areas in which I'm interested:
- Digital Technologies
- Digital Libraries
- Open source software
- Information Systems
- Information Science
- Information Management
- Knowledge Organization
- Content Management Systems

Professional Experience

The following list demonstrates some of my professional experience:
- Teach and educate undergraduates and postgraduates students in the domain of information studies. I have more than twenty years of experience in research and instruction.
- Train and instruct undergraduates and postgraduates students in the use and utilization of open source content management systems such as Greenstone, Fedora, Eprints and Dspace.
- Highly proficient and experienced in designing digital libraries and institutional repositories by using content management systems.
- Extensively practised in managing , organizing and administrating conferences, symposiums and seminars.
- I am involved as an academic editor with more than 100 international journals devoted to the area of computer and information science. In addition to that, I have been appointed since 2011 to serve as a committee board member for over than 220 international conferences which were held in different parts of the world with the aim to endorse, promote and facilitate the aforementioned field.
- As academic editor and editorial board member of several international journals, I always attempt to strength the journals' mission by fostering vigorous, informative, peered discussion and debate. I make every effort to join in their discussions where appropriate, propose suggestions for improvement in the journals' services, offer advice on the strategic direction, assist and help out as well chief editors in establishing suitable policies and where possible endorse and promote the journals to members of the profession.
- My role and responsibility as managing editor for some academic journals constitute actively participating in selection of papers and articles, appointing editors as well reviewers for peer review of manuscripts. I hold also the responsibility to publish high quality research papers. Therefore, the decision I take regarding the acceptance or rejection of the manuscript should depend all the time on the worthiness, quality and originality of the content. In view of what mentioned, I'm certain that with so much enthusiasm and support, we can make our ambitious goal of narrowing the digital divide through knowledge sharing a reality.

Membership of Professional Associations

Associations	Membership/Role	Member since
• **JISC**	Member	July 2007
• **IFLA**	Member	June 2009
• **AICIT**	Member	July 2010
• **SDIWC**	Member	June 2012
• **IAES**	Member	March 2013
• **IACSIT**	Academic Member	June 2015
