**MORNING/AFTERNOON COLOR DETAIL:** Belanger, Martelly, Williams, D, Alemu

**ALL HANDS**

- All NS1/2 drillers should be showing up ready for practice this week, we need to nail these routines!
- All prospective PARS test takers should be studying the CFM and all other knowledge.

**CURRENT EVENT OF THE WEEK**

Formerly the fastest flowing and thinning glacier in Greenland, the Jakobshavn Glacier has taken an unexpected turn. Instead of pushing further inland, the glacier is moving towards the ocean and is flowing slower and thickening unlike before. NASA has determined it occurred because an ocean current that brings water to the glacier's ocean face grew much cooler in 2016 and water temperatures have been at an all-time low since the 1980's.

**QUOTE OF THE WEEK**

“Whatever you do, do with determination. You have one life to live; do your work with passion and give your best. Whether you want to be a chef, doctor, actor, or a mother, be passionate to get the best result.”- Alia Bhatt

**NAVAL TERM OF THE WEEK**

Starboard- Right side of the ship when facing towards the bow.

**LEADERSHIP QUALITY OF THE WEEK**

Passion- a strong liking or desire for or devotion to some activity, object, or concept.
