## From the Editor

The weather has been the main talking point lately and in the high temperatures we have been having I wondered how you have coped in your workshops, or have you abandoned them for a seat in the shade sipping on a nice cool drink.

Spare a thought for those who woodturn for a living where the lathe must turn to bring the money in or they go hungry. I don't do much woodturning these days but my shop is set up for the winter with a fan heater and good insulation against the cold. In the hot weather the insulation works against me keeping in all that hot air which is generated by the machinery. Air conditioning wasn't on my agenda when I set up my workshop, in any case the cost of it would have put me off.

How would you like to put pen to paper or email me and tell me what your solution to the problem is, a photo of any special set up would not go amiss and then I would like to publish your answers to the problem in the newsletter, I am sure there are plenty of readers who would be interested in other peoples solutions to this common problem.

Let us keep our fingers crossed for good weather on September 14th and 15th for the "Festival of Crafts", the hard working organisers deserve to be rewarded by favourable weather.

Graham

## Chairman's Jottings

This past two months have been really busy for the club with the "Godiva Festival", "Party in the Park" and "Charnwood Open Day". I would like to thank all the members who turned up to help out, this is much appreciated.

As you may or not know we now have a card machine to enable us to sell more items - most times visitors did not carry cash.

Brian Edwards

By the time this goes to press, the August Bank

Holiday will have passed so the next big one is "Festival of Crafts" in September, so please come and help us in any small way - no matter how many hours, it will be invaluable, thank you in anticipation.

Whilst visiting at Charnwood open day we were introduced to a new lathe - one that is in the process of being launched.

We now are delighted that Charnwood is letting us try it out for three weeks at our club.

We will have to give feedback on this new machine so please try it out and give your opinion - good or bad!

We have purchased two new stands for our lathes in the workshop from Charnwood - Eric Taylor did a great deal with Charnwood for these items.

Any members who have items to donate to Festival of Crafts would be brilliant, or anyone who would like to make Hedgehogs or Mice. Little items for the children. Many thanks.

Please remember, Xmas Ticket Bookings for the Party will be ready in the next month.

I'll sign off now, but be safe in your workshops and keep turning.

*Brian*

Anyone who has outstanding raffle tickets, could I please have them returned at the latest the end of August please. The club workshop would be the best place to return them.

*Many thanks Alec.*

oOo

## HAMLET TURNING TOOLS

If your preference for turning tools is Hamlet, then you will be pleased to know that these very fine quality tools can be purchased through our very own club member, Eric Taylor. All tools displayed in the catalogue can be supplied.

**Ring: Eric Taylor on 02476 328831**

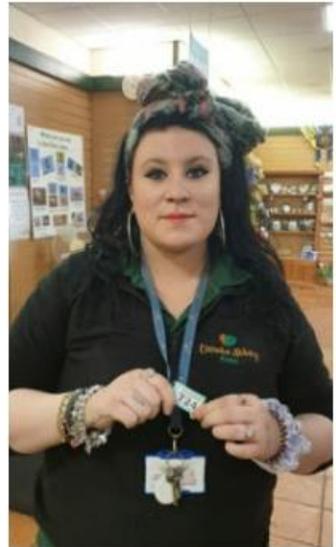

oOo

### **The 50/50 workshop draw raised £60.50 this month.**

The winning Ticket **724** received **£30.25** and **£30.25** went into the lathe fund. The winning ticket was drawn by Hannah a staff member at Coombe Abbey Park.

Just a reminder to all members you can be in with a chance of winning. It's a maximum of one ticket per member per visit. You have to come into the workshop to buy a ticket.

Put 50p in the collection box, take your ticket, write your name on the ticket left in the book, and wait till the end of the month. Half the money goes to the winner and half to the lathe fund. Good luck to everyone.

oOo

*One Line Philosopher:*

Keep questioning until you reach that 'ah-ha' of understanding.

## **This Months Sponsor**

I would like to thank Hegner UK for agreeing once again to sponsor our September Newsletter. Without companies such as Hegner we would struggle to produce a monthly magazine so it is extremely important that we support our sponsors buy purchasing products from them. It is worth checking out the Hegner UK website and looking at what is on offer such as lathes sanders and of course scroll saws among other items which are made to the highest specification.

*Editor*

**HEGNER UK – the home of quality woodworking machines**

Whether you need the power to turn large pieces of wood or the finesse to cut the finest detail, here at Hegner UK we have a quality, long lived machine for you. We know that serious woodworkers do not buy a machine for a one off job or for occasional use but look for something that will give reliable service for a lifetime. The machines we offer have been built with reliability at the forefront of development. It is this reliability that has many Hegner scrollsaws & lathes still in excellent operating condition many years after first use.

Buying a Hegner machine is a real investment in your craft. See what Hegner owners think by reading our testimonials.

Hegner UK is part of Technology Supplies Ltd; a company dedicated to the supply of quality machinery, consumables, and workshop solutions.

Hegner UK is the sole UK agent for HegnerPrazisionsmaschinen GmbH based in Schwenningen (near Stuttgart) in Germany. Hegner have established a fine reputation as manufacturers of high quality woodworking machinery. Internationally renowned for introducing the first modern machine fretsaw/scroll saw over 35 years ago, they have kept ahead of the competition because of their insistence on high quality and constant innovation. Today they manufacture a wide range of woodworking machines to the highest standards in their factory in Schwenningen in the Black Forest.

# HEGNER

## Get Creative...

Hegner scrollsaws are considered to be the most precise fine-cut saws in the world. They are suitable for professional woodworking and metal cutting in joinery, carpentry, tinsmith shops, metal workshops, model building, training compaines, sheds and art & crafts.

Visit our website to view our popular scrollsaws as well as 'Spare Parts Finder', 'Latest News' and 'Project Showcases' from the woodworking community.

A Demonstration by  
**Paul Hannaby**

On Thursday 1st August at Shilton Village Hall

*Report by Janet Blake*

*Pictures by Martin Hitchiner*

**After a delayed start, Paul demonstrated two bowls -**

For the first, he used a nice chunk of walnut with good grain markings. He used a screw chuck with a spacer to create a spigot which he prefers as it gives more options for finishing the base of the bowl,

(foot or no foot), if you haven't decided on the finished item before you start. He quickly shaped the outside of the bowl

with a fingernail ground spindle gouge and discovered the wood had a few worm holes near the rim. Once he had the desired shape he used a pull cut to improve the final surface. He then used a trick I'd not seen before, a thick, long glue gun stick was placed on the outer curve, one end at the base, the other at the rim, it was flexible enough to tightly follow the wall, showing

up any lumps and bumps, light can be seen through the gaps if it's not smooth. He then put the spigot in the chuck ready to shape the inside, he had to adjust this to get it running true. He clearly explained some detail about the tools and grind angles he uses and why, some being - using double grinds,  $50^\circ$  for general use,  $60^\circ$  for deeper cuts and  $70/75^\circ$  for bowl bottoms. He also

showed a heavy, screw on handle that was full of lead shot that was good for damping down vibration to get a smoother cut. At this point he decided to take off the top  $\frac{1}{2}$ " to remove the worm holes, so the bowl got a bit shorter. He turned the inside aiming at all times to have the centre flat.

He gave a good demonstration of how to reduce vibration noise, **relax** and don't put pressure against the wood to reduce chatter, if you still have vibration always sharpen your tool, and another solution can be to change to a smaller gouge or support the outside of the bowl with your hand. He turned off the spigot to create a smaller foot. He didn't bother fully finishing it, sanding etc, and donated it to the club for a prize. A nice piece.

The second was a very thin natural edged cherry bowl with wings, which when finished weighed nothing, he said he sometimes leaves the base a bit thicker so they don't blow away! He warned that if you intend to do a thin piece do it in one go, if you stop for lunch cover with a plastic bag or it is very likely to crack. Another tip,

wood cut in the winter has bark that is better attached and less likely to fall off.

A large piece of cherry had been roughly cut with a saw before-

hand. He took some time to mark where the centre point was to ensure the wings would be level, using the tool rest as a guide. Once happy with the position he turned the wood so that the drive centre drilled through the bark and into the wood so it was securely embedded.

He made a 2<sup>2</sup> spigot with a flat shoulder for a more secure fit in the chuck. Still using the drive centre he turned the

outer surface starting in the centre and moving outwards to the rim edge, until the cut started to rip the bark, then changed to cutting from the bark rim inwards, being careful to find the wing edge at the start. He suggested having a white background makes it easier to see where the edge is. Also using a faster speed means there is less bounce on the cut corners. Turning a thin piece requires a good finish to do minimum sanding, so he took his time to use shear cuts to get rid of torn grain.

He turned the piece and put the spigot in the chuck, He started

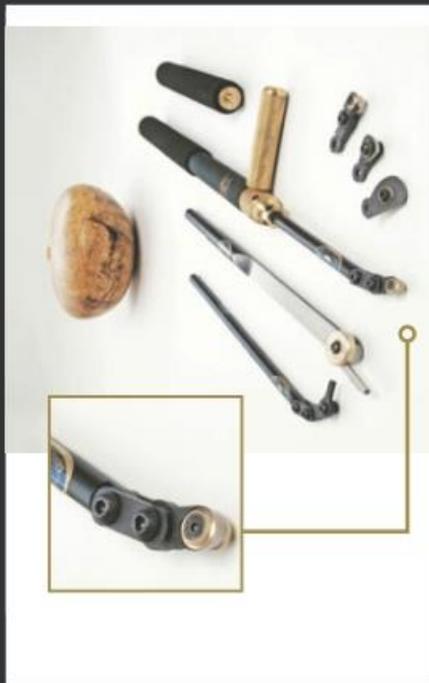

from the outside turning small areas at a time to get the thinness required, then moved inward completing a small section at a time blending each and ensuring the correct thickness (about 3mm). At the centre of the bowl, because the surface speed of the wood is slower you need to slow the tool movements down as you approach the centre. He shone a light through it, you could see it was a little thinner around the base (glowing pink), but to touch I couldn't tell. Finally he turned it round, held by friction on a wooden dome to reduce the spigot to create a foot and blend the outer surface curve. This was an impressive showpiece. ■

# INTRODUCING THE NEW REVOLUTION

The "revolution" is a completely new hollowing system from the world leaders in fine turning tools. From its beautifully weighted handle to its cryogenically treated cutting tips the "revolution" is designed to be the finest hollowing tool on the market.

The modular articulated design allows the woodturner the freedom and flexibility to configure the tool for any situation. From straight vases to heavily undercut hollow forms the "revolution" has it covered.

At the heart of the "revolution" is the new fully depth adjustable "super ring" the revolutionary design of the "super ring" ensures clean efficient wood removal at all times with 5 different cutting tips and modular articulation design the revolution is a must have tool for all woodturners.

- Supplied with 5 different cutting tips for unrivalled flexibility.
- Clever modular design allows for many different configurations.
- All collars and collets beautifully machined from solid "marine grade" brass billet.
- High performance cryogenically treated cutting tips for vastly improved wear resistance.
- New adjustable "Super ring" allows ultra efficient wood removal without clogging.
- Slim-line articulated tip design for unrestricted access to those hard to reach cuts.
- Expandable.
- Hand made in Sheffield, England.

# Charnwood Open Day

Saturday 17th August 2019

*Report and Pictures by Graham Ball*

Charnwood's annual open day is always a pleasant way of spending a few hours, meeting lots of like minded individuals, browsing all the machinery tools and accessories on offer and of

master Bob Neil.

This year I was only able to stay for a very short time but managed to chat

with lots of people and discuss the machinery which was on display in-

course watching the demonstrations on the lathes, and this year marvelling at the expertise with the pyrography machine by the

cluding a new one to me located on the mezzanine floor. The machine in question was a large “Laguna Revo 18 -36”. I had the full attention of the representative who explained everything to me and answered all my questions. This

very sturdy machine is certainly worth considering if you are serious about your woodturning and wish to upgrade.

Coombe abbey Woodturners were well represented and I counted four-

teen of our club members in just the short time that I was there. Phil Steele and Pete Wright were manning the lathes whilst I was there and each of them had lots of interest and questions being asked by the visiting public.

There was a steady stream of people going through the checkout and I am told that there was a good amount of machinery going through the door. So hopefully Charnwood will have done well and will make it worthwhile to carry on with their open day for years to come.

## The Chestnut Weekly Newsletter.

Have you signed up for this yet? There is so much information. As I had a page free in this magazine I thought I would share it with you. I have had to reduce the font size to make it fit I hope you don't mind that Terry?  
*Graham Ball News Editor*

Last week I mentioned our YouTube channel, great to see many of you heading over there, and a few people have queried the video about ['Decorating an Ash Vase'](#) in which, if you haven't seen it, I use Gilt Cream to highlight the open grain of the Ash. To clean up and remove the surplus Gilt Cream I use Cut'n'Polish in the video. Where people have copied this technique they've removed nearly all of the Gilt Cream. What's gone wrong?

It's hard to be precise, but there are a few things to look out for. It might be that the Gilt Cream hadn't been left long enough to dry. It only needs a few minutes normally, but I'd possibly suggest leaving it a bit longer if you're using the Cut'n'Polish to clean up.

It might also be that too much Cut'n'Polish was used, it is abrasive and it's quite easy to be a bit too liberal with it. This doesn't matter in normal circumstances but it could well make a difference in this technique.

And the other factor, that someone else pointed out, is that the timber itself might not have enough grain to hold the Gilt Cream. It does need to be Ash or Oak for the best effects, and even better if the grain is opened first with a Liming Brush as in the video.

If you're still struggling after all this, then don't use Cut'n'Polish for this part of the process, use one of our oils instead. Lemon Oil, Hard Wax Oil and Food Safe Finish are all very good for this.

Talking of Hard Wax Oil, someone else asked: on the can it says that 'a very smooth surface can be achieved by applying the oil with a fine abrasive'. What does that mean?

The idea here is to use the oil as a lubricant for the abrasive; it stays wet long enough to allow this and the sanding action of the abrasive is improved by using the oil. This also cuts down on the dust generated.

There are two popular ways of doing this. I normally apply a small amount (and only a small amount is needed) of oil to a fine abrasive; our cloth backed abrasive in 320 grit is good for this, or a Red or Orange NyWeb. Net Abrasive isn't so great as the oil will just go through it. I then sand as normal and the oil on the abrasive does its magic.

The other alternative is to apply the oil to your work and then sand it almost straight away, whilst the oil is still wet. Be sparing again with the oil or it can get messy, and with this technique you can use pretty much any abrasive of 320 or higher.

Our final question this week concerns the mandrel supplied in the Buffing Wheel Kit; will it fit a Supernova chuck? The answer is yes, it's designed to fit pretty much every chuck we can think of in one way or another. The Large Mandrel (the better one to use on the lathe) is stepped at 18mm and 25mm, either section can be used to mount it. As long as the jaws on your chuck will close to this you'll be fine.

The kit also includes the Small Mandrel and this fits into a Jacob's Chuck so this is another option.

That's all for this week folks; a long weekend looms and we're supposed to have some good weather. We'll see...

Whatever the weather I hope you have a good one and I'll be back here again next week.

All the best

Terry

# The YANDLES Show

6th & 7th September 2019

**Exclusive Show Deals**  
Discount on all Timber  
**New for 2019 Makers Corner!**

Demonstrations throughout the day  
Trade Stands plus Show Offers  
Hobbies and Craft's Marquee  
Save 15% off ALL Timber

**WITH FREE ENTRY AND PARKING**

For more information visit [Yandles.co.uk/theshow](http://Yandles.co.uk/theshow)

All at Yandles, Hurst Works, Martock, Somerset TA12 6JU

Tel: 01935 822207 • [www.yandles.co.uk](http://www.yandles.co.uk) • email: [sales@yandles.co.uk](mailto:sales@yandles.co.uk)

Special Guests

*Once a year,  
every September, the Only  
Woodworking & Crafts Show  
you need to attend  
this year!*

**6th & 7th September 2019**  
Friday 10am-5pm / Saturday 10am-4pm

Thousands of visitors come from across the country, to enjoy the informal & friendly atmosphere that is created within the surroundings of our historic timber yard.

The usual working site is transformed with marquees which host a vast array of leading craftpeople. Live Woodworking demonstrations will keep you entertained with new techniques to learn, useful advice on timber, tools, machinery and handy tips.

Always the highlight on the woodworking events calendar:

#### Trade Manufacturers Attending The Show 2019

We are happy to announce the line-up for this year!

**VISIT YANDLES.CO.UK/THESHOW**

to view the FULL LIST of Demonstrators & Trade Manufacturers, including the **biggest names in Woodworking:**

Record Power, Kreg, Triton, Mirka, Hampshire Sheen, Tormek, Charmwood, Laguna, EasyWood Tools, Startrite, Rockler, Yorkshire Grit + **MANY MANY MORE!**

**Demonstrators Attending The Show 2019 include:**

Jim Overton, Colin Simpson, Bob Selway, William Hunt, Simon Hope, Martin Saban-Smith, Sean Helman, Gianni Deidda, Ben Crowe, Bee Mathews + **MANY MANY MORE!**

All onsite at Yandle & sons LTD,  
Hurst works, Martock, Somerset, TA12 6JU

Demonstrations throughout the day • Trade Stands plus Show Offers  
Hobbies and Craft's Marquee • Save 15% off ALL Timber

**WITH FREE ENTRY AND PARKING**

## Activities in the Workshop

Its that man again. Alec Steedman turns a pen in the workshop at Coombe.

Below:

Although not in brilliant health you can't keep a man like Don Robins off the lathe for long.

## THE MAIL ORDER ABRASIVE SPECIALISTS

Sanding needs as much care as construction and design. As much care needs to be taken in sanding as in the construction of a piece of work. A few minutes poor sanding technique can irreversibly destroy great craftsmanship and many hours work.

### THE ULTIMATE ABRASIVE! RB406 J.FLEX. TRIAL PACK

1M OF CLOTH IN EACH OF THE FOLLOWING GRITS.

P80, P120, P240 AND P320 **£14.75** INC VAT ORDER CODE **12806 RB406**

J.Flex is the best abrasive for every workshop. It's ideal for turning, woodworking and metal working. The distinctive blue abrasive with the yellow backing is the softest and most flexible abrasive we have ever discovered. The ultimate abrasive for all kinds of woodworking, especially sanding in acute areas. This cloth can be twisted and folded without grain dis-adhesion. Rolls are 100mm wide. **ALSO AVAILABLE BY THE METRE.**

### VELCRO-BACKED ROLLS.

TRIAL PACK 1M OF P100, P150, P240 AND P320 PLUS A SAMPLE STRIP OF VELCRO REPLACEMENT WITH PEEL OFF SELF ADHESIVE BACKING. **£14.75** INC VAT ORDER CODE 13159 ALSO AVAILABLE BY THE METRE. PLUS - IT PAYS TO BUY BIG.

WITH OUR BULK RATE PRICES YOU'LL SAVE MONEY ON THE GRITS YOU USE MOST.

Cut off any length to suit your own sanding application. Every workshop should have at least two or three grades of this to hand. Especially manufactured by Hermes abrasives for us. Ideal for those shop made sanding devices which you can now make to your own specification. Hook and loop, or velcro attachment does away with the unpleasant task of clamping the paper to the machine, allows rapid changing of the sheet and encourages the use of more grits extending the finish quality and life of the abrasive. Rolls are 115mm wide.

# Introducing the Brand New Range of Woodturning Chucks and Jaws

We are extremely proud to introduce the brand new range of Record Power woodturning chucks and jaws. This exclusive new range has been developed using Record Power's extensive experience and knowledge of woodturning in conjunction with a group of highly experienced professional and hobby woodturners, to bring you the ultimate in quality, versatility and value.

#### Precision Engineered Gears

Super Geared True-Lock™ technology ensures high levels of accuracy to provide smooth and solid operation.

#### Jaw Fixing System

The SC3 and SC4 feature a jaw fixing which will not only fit the Record Power series of Jaws but is also fully compatible with Nova and Robert Sorby brand jaws.

#### Heavy Duty Jaw Slides

The improved and enlarged jaw slides give unsurpassed holding power and load bearing ability. They are made from high tensile steel, reinforced with nickel and copper and heat-treated to ensure superior strength.

#### Sealed Backing Plate with Full Indexing

The SC4 features a strong backing plate to protect the gear mechanism from dust and 72-point indexing around the full circumference.

**Brand New Exclusive Jaw Range**  
Fully compatible with Nova brand chucks.

Incorporating more than another 60 additional brands of quality tools and accessories since 1909. Over 100 years of history. A true professional's partner. The most complete range of tools and accessories in the world. **RECORD POWER** is the name you need to know. **RECORD POWER** is the name you need to know.

In Store Demonstrations at  
**Axminster Tools & Machinery (Nuneaton)**

Saturday 28th September

10:00am - 2:00pm

Join Event

Nuneaton Store - Craft Lathes, Bandsaws And Wood Blanks

Offering affordable quality and precision, our Craft lathes have brought a great number of newcomers to the world of woodturning since their introduction nearly a year ago. At this national store event, we'll review the range and show you just why these lathes have proved so popular, demonstrating the many features which position them above entry-level lathes. We also have a great offer in September - buy a Craft lathe and we'll include a half-price accessory plus you'll get a free three-hour introductory training session.

At the demonstration, our store specialists will also suggest ways in which our high-specification Craft bandsaws can compliment your lathe projects and we'll have our latest stocks of exotic and indigenous wood blanks displayed and ready to take away. Whether a novice or experienced woodworker, if you're looking to venture into woodturning, make sure you don't miss this informative and inspiring demonstration.

Website: <https://www.axminster.co.uk/stores/nuneaton/>

Full details of all our events can be found on the Axminster web page.

As always all the events are free to attend.
