

BIOCIDAL WALLWASH

PRODUCT DESCRIPTION

An industrial cleaner & disinfectant.

PRODUCT FEATURES

Biocidal Wallwash has a broad spectrum activity for complete microbiological protection. It eliminates all micro-organisms, biofilms & fungal growths on substrates such as walls & ceilings in humid conditions, e.g. bathrooms, public showers & coastal housing.

SURFACE PREPARATION

Wash or scrub surface, using a stiff bristle brush & water to remove excessive growth before painting substrate.

Apply with a large paintbrush (100 mm), ensuring the elimination of remaining spores. A second coat should be applied within 8 hours & allow to dry prior to painting.

For best results, paint with O' Grady's paint containing dry film anti-fungal additive. The addition of Biocidal Wallwash directly into paint, will also assist with the control of fungal growth. Normal addition is 50ml Biocidal Wallwash to 5litre paint.

APPLICATION

Use as supplied (undiluted) for best results.

Brush: Use large brush (100mm)

STORAGE & HANDLING

Wear protective clothing e.g. rubber apron, full length gloves, chemical resistant shoes & chemical splash goggles.

SAFETY PRECAUTIONS

Avoid inhalation, ingesting, skin & eye contact. In case of contamination, seek medical attention immediately.

KEEP OUT OF REACH OF CHILDREN.
