Both of the above courses deliver exactly the same content with the exception of Chapter 3 on Assessment. The Full VdTMoCA training for Occupational Therapists is comprised of 19 taught content online modules requiring 3 days of study, plus 2 modules providing information for post-training reference (how VdTMoCA-informed occupational therapy can be recorded; how the application of the VdTMoCA / VdTMoCA-informed occupational therapy could be explained to others).

General information

The amount of study time required depends on each individual’s learning style and on the amount of additional reading s/he wants to do. Some information on the VdTMoCA-informed occupational therapy process is delivered in the course workbook, but is not part of an online narrated module. This information is designed to be useful post training, therefore, time taken to read this material is not included in the approximated study days. Participants should also allow some time for downloading and printing the course materials before starting the online modules.
The modules can be accessed at any time within a **2-month period (see Terms & Conditions)**. **On completion, the participant’s place will expire and the account deactivated two days later.** The course can be worked through at one’s own pace, but learning will be most effective if it is completed within a week or over a couple of weeks, rather than leaving long gaps between modules. This is a comprehensive course, therefore it is advisable to study where it is possible to focus fully and take regular breaks. It is advisable to regard the online course in the same way as a face-to-face course, i.e. one would be absent from work in order to attend a face-to-face course, therefore book study leave if possible in order to complete the course outside of the work environment.

The courses are organised in **chapters**. Learning exercises which may be done individually or used for **collaborative/shared learning** are indicated in **purple**.

System requirements
The courses do not support Internet Explorer versions 6-10. If you are using any of these versions, please consider switching to Internet Explorer 11 or another browser. It is recommended that you upgrade to the latest versions of Chrome, Firefox, Safari, or Edge. Many modules are narrated and contain images or video footage, and large in size. Therefore, it is probably best to view modules via a PC internet connection rather than on a mobile phone.

Feedback
Occupational Therapists’ feedback:
The slides were presented very clearly, and I really appreciate the narration and explanation. It gives the slides more ‘context’. I also appreciated the photos/pictures/video- they certainly help me to visualise much better.

I enjoyed the training; the narration helps to bring life to the learning. It also gives me some time to mull over the information taught- a pause button away :)

Information was concise, not too lengthy. Content broken down to chapters made things more manageable. I enjoyed the specific case examples. It’s like listening to client stories. Was also great to see the actual products that clients completed.

Super appreciative for the course. Enlightens me on new treatment approaches with some clients that I had previously felt stuck or lost with.

Overall, it was a great course not only for therapist who have not used this model, but also for those who may have had some experience trying this model out. It provides a comprehensive overview of the VDTMoCA from its fundamental theoretical assumptions and concepts all the way to using this model to guide us in practice, which I feel is very helpful.

I really enjoyed the online course, due to the way I take in information and learn it was very helpful to have the slides and the workbook to note take. I also liked the content and felt it went into enough detail. I am feeling confident to now place this into a new service!
