

Company PROFILE

Peak Tactical Pty Ltd is a risk management company specializing in risks encountered when confronting criminal activity, during defense operations, when strengthening counter terrorism responses and other specialist tasks conducted in high risk environments.

Our clients are exclusively from the government sector covering law enforcement, defense, aerospace and resources. **We focus on developing capability** within our clients so they are equipped to resolve future challenges with little or no input from ourselves.

When developing a client's capability our solution may comprise knowledge transfer, technology or leadership development; augmented as necessary by relevant products. Some products we engineer ourselves if the market is unable to mitigate a risk clearly identified in a client's operations.

Examples of such innovations are the world's most powerful miniaturized lasers, integrated tracking devices that compensate for the limitation of any one technology, and command-level simulation training to improve decision making in high stress environments.

We hold a number of global exclusives in low-light surveillance such as world-first IP over supporting technologies that mask disclosure of night vision use - including even in the passive surveillance role; or increase surveillance ranges under the most adverse conditions.

Peak Tactical Pty Ltd is one of only two Australian manufacturers of Night Vision equipment, and supply elite Police and other government users within Australia as well as exporting to off-shore Defense, Special Forces and Federal agencies. A wide range of vehicle, rotary wing and man portable thermal and night vision light intensifiers are offered.

The company is well regarded in the market for its advanced training programs and has successfully delivered tactical training in many regions including pioneering tactical training delivery to friendly nations in conjunction with the Australian Federal government. Recent examples include the planning and conduct of CTR patrols in the Middle East, to the Giving of Evidence to western courtroom standards to secure convictions.

Peak Tactical Pty Ltd publish a training catalogue containing over 28 major programs and deliver these to approved Defense, State and Federal agencies. Other custom programs range from the emplacement and recovery of recording devices in high threat scenarios, through to 'One-Pass' urban reconnaissance used in counter terrorist operations.

Currency with countering operational risks is maintained through our own direct support and deployment with clients into zones of conflict, augmented by close cooperation with a number of key offshore agencies and other global alliances. This ensures we remain abreast of the latest threats and assist clients to anticipate terrorist tactics imported from the Middle East and elsewhere, before these threats are used against them.

With over 20 years conducting risk reduction programs **we offer genuine current expertise in countering security threats that can derail a unit's mission or an agency's operations.**

Peak Tactical Pty Ltd
contact@peaktactical.com
Phone: +61 416 004 731

Originally formed in 1989, the company subsequently re-registered in Queensland, Australia in 1997 so as to be nearer key regional markets. In 2010 it divided its security and defense business from the parent company and in late 2012 formed a further arm, Peak Tactical Pty Ltd specializing in support to Partner companies.

Offshore contracts proceed only after seeking and being granted export approvals issued by the Australian Department of Defence based on end user certificates. We are a Defence-compliant organization.

Peak Tactical has a long standing relationship with High Mark Defence Group Ltd who are our appointed representatives located in Texas. They are Peak Tactical's authorized point of contact for North America and selected other nations.
