Standard hoops: Large 140mm x 200mm Standard 126mm x 110mm	Built-in memory – save your design to the machine memory	

USB Port

The USB port gives you additional design options. Import designs and layouts you've downloaded off the Internet or a CD-ROM using a standard memory key device. And, because the MC370E is compatible with powerful Janome embroidery software, Digitizer JR and Digitizer MBX, when you finish creating a custom design on your computer, just download it to a memory key and bring it directly in to your MC370E.

Backlit LCD Touch Screen Takes You Step-By-Step

On-screen controls are simple and powerful. Editing is as easy as touch and drag. Add fonts to your layout. Save designs to the built-in folders or to external storage devices. It's easy enough for a beginner but also has the sophisticated options an advanced user looks for.

Extra Choices For Built-in Flexibility

You can choose from four hoop sizes, three built-in alphabets, and one hundred built-in embroidery designs. An improved file system makes it possible to create multiple folders using ATA PC cards and USB memory keys.

Automatic Thread Cutter

It's the one feature embroiderers say, once they've used, they can't live without. Fast and easy, the automatic thread cutter does just what its name implies: as soon as a thread color is done stitching, both the top and bottom threads are snipped clean and close.
