The RHA Bill Passed; Governor Cuomo Signed It

Pro-lifers all hoped it would never happen, but no such luck. After the election last November the NY State Assembly and Senate gained Democrats, all of whom are militant pro-aborts.

On January 22nd, on the anniversary of Roe v. Wade that legalized abortion, the House and Senate passed the most egregious and dangerous pro-abortion bill in the history of our country. The so-called "Reproductive Health Act" is not healthy and there is nothing reproductive about it.

Gov. Cuomo immediately signed the bill and in an arrogant fashion celebrated by lighting up several New York landmarks in pink. This was a horrible display and obviously intended to push his agenda down our throats. Over the next week, Gov. Cuomo doubled down by defending his position on this cruel barbaric law.

Under the new RHA law, abortion is established as a fundamental right in New York and the unborn child is denied any rights to personhood. That means that if a woman is in her third trimester of pregnancy and is attacked causing the loss of her child, the perpetrator will not be charged with murder.

Since the bill became law, a young pregnant woman was repeatedly stabbed to death in Queens, NY. Jennifer Irigoyen was 35 years old and 5 ½ months pregnant. Her unborn child was targeted as the woman was repeated stabbed in the stomach during the attack. Her ex-boyfriend, Anthony Hobson, 48, was arrested will not be charged with a double homicide. LifeNews.com carried the story.

Virginia Gov. Ralph Northam Defends Killing Babies

No sooner had the ink dried from Gov. Cuomo's pen that a new video emerged of Delegate Kathy Tran of Virginia with a bill that is very similar to the one passed in New York. In the video in which she gives details of what is in her death bill, it took Tran several minutes to finally answer that yes, her bill would allow babies to be killed when the mother is in the last stage of pregnancy, when she is "dilating." Here is a link to the [full video](#).

Kathy Tran's video was followed by Virginia Governor Ralph Northam's [defending infanticide](#) on born babies. Immediately after the governor's reprehensible comments, photos emerged from his 1984 yearbook showing him either in blackface or dressed in a KKK robe and calls for his resignation. Then Virginia Attorney General Mark R. Herring admitted to wearing blackface in college. These stories and images are disgusting but are simply distractions from Gov. Northam's infanticide remarks.

President Trump's SOTU is a Home Run for Life.

President Trump gave his State of the Union Address to the nation this month was a home run. He honored heroes and Holocaust survivors, and made the strongest statement defending the unborn of any president since the Roe v. Wade ruling. Here is the link to the [full text](#) of his speech.

The pro-abortion Democrats in Congress wasted no time. They already killed bills introduced that would have protected unborn children.

Following the president's speech, four times in three days the Democrats have rejected every attempt to stop infanticide by providing medical care to infants that survive botched abortions. Most Americans are not aware that under the new Reproductive Health Act signed into law by Governor Cuomo, there is no provision to save babies that survive late-term abortions.

The March for Life 2019 - Unique from Day One!

On a much happier note, The March for Life 2019 was an AMAZING and huge SUCCESS! What an incredible turnout especially of young people. Every year, more and more young people are in attendance, and this year was no exception. Now it's not only millennials, but the young Generation Z attendees are out there marching. The pro-life crowd was alive with enthusiasm, excitement and energy!

Ben Shapiro was the keynote speaker, and he delivered a powerful and awe-inspiring address to the crowd which drew a round of applause and chants of "Ben, Ben, Ben...!" Here is an excerpt from his speech, which can also be found in its entirety at the following link on [YouTube](#):

This year the theme was "**Pro-Life is Pro-Science.**" Recent scientific advancements in neonatology, and 3D/4D ultrasound technology images prove that unborn children truly are unique from the moment of conception, are capable of feeling pain and abortion must be outlawed.

Some of the most important pro-life leaders came to Washington D.C. Pro-life speakers included **Abby Johnson**, who was once Director of a Planned Parenthood abortion business. The story of her transition from Planned Parenthood to pro-life is the subject of a new film, "[Unplanned](#)," to be released in the spring.

Lila Rose, Founder of [LiveAction.org](#) was interviewed and talked about how important it is to expose the history and racist origins of Planned Parenthood. **David Daleidon**, famous for his investigative journalism and video recordings into the [baby harvesting business](#) of Planned Parenthood, provided updates on the California preliminary hearing beginning on February 19 which will be a two-week process. This will be a public hearing and the Planned Parenthood abortionists will be taking the witness stand.
