Subject: Update from the Fannins

Some of you may know by now that on Aug 27 Rick had a heart attack. We got to the hospital and some treatment within 30 mins. He was in the hospital for a week.

At 12:30 am on his birthday he was having definite chest pains so off we went to the hospital. All they have been able to do is give some relief and medication to allow the heart to get the needed blood. We hope.

It was recommended that he have an angiogram to detect the severity of the problem and have the necessary procedures to correct it. There are two places we could go that do that sort of thing. Considering we have no health insurance available to us here the out of pocket would be well over \$10000. That of course is no where the cost if we had it done in the states, however, Rick has two sources of health benefits to draw from in the states: medicare and VA Benefits. It would be virtually free there. So we have chosen to go to the states. We leave from Roxas on the 24 of this month and then leave for the states on the 25th. We just arrived back from a short trip in the states two months ago yet we feel it is important to get this heart issue dealt with.

I posted his heart attack on facebook, but apologize for not letting all of you know sooner. I was spending all my nights in the hospital. We do covet your prayers that it will be a minor fix.
