

# GeoproHYDRA™ PRO Enables Customer to Successfully Deploy 7” Casing in Difficult and Problematic Wellbore

Vertical Section

Plan View

- Reamed from 2415m – 4479m
- Differentially stuck @ 4045m
- Poor centralisation led to severe string buckling
- GeoproHYDRA™ reamed through entire section with up to 35T (77 kips) surface applied weight to string to overcome buckling

## Customer Feedback:

Let me to congratulate you with the next success run of HYDRA7"

General Client [REDACTED] and Drilling contractor GPB dont's have any doubt that without HYDRA it wouldn't be possible to reach 4475 m.
